

# BRIDGE COLLECTION

## DINING TABLE

The Bridge Dining Table is inspired by the architecture of the ancient beam bridge. Just as a beam bridge's structure allows for incredible spans, this table can be custom fabricated to almost limitless lengths, comfortably accommodating even the most substantial dinner parties.

Spanning both traditional and contemporary lines depending on finish selections, the Bridge Dining Table offers tremendous versatility. Whether crafted with a live edge walnut top and carved, charred cedar bases for a more rustic look, or in solid white oak throughout for a streamlined, contemporary feel, the Bridge Dining Table exudes elegance and sophistication.

The combination of rich materials and expert craftsmanship ensures that each table is not only a functional piece but also a striking work of art, making it a perfect centerpiece for any dining space.

Also available as a console or cocktail table.

Live edge detail optional
